EDUCATION

Xi'an Jiaotong University, Honors Science Program (Mathematics)
B.Sc. in Mathematics

Xi'an, China
Sep. 2023 – Jul. 2027 (expected)

- Supervisor: Kuize Zhang @ Xi'an Jiao Tong University
- GPA: 3.73/4.30 | 87.83/100
- Research Interest: Formal Method, DFA, CP
- Programming: C, Matlab, Python, Lean, MiniZinc, Maple
- Tools: LaTeX, Git, Github, HTML/CSS
- Relevant Coursework: Theory and Algorithm of Optimization, College Computer - Algorithm Programming, Numerical Analysis, Probability, Mathematical Statistics, Abstract Algebra I, Topology

Monash University
Exchange and Study Abroad Program

Melbourne, Australia
Feb. 2026 – Jun. 2026

- Mentor: Guido Tack
- Enrolled Courses: Theory of Computation, Symbolic Logic, Discrete Mathematics for Computer Science

RESEARCH EXPERIENCE

Formalization for MiniZinc in Lean

Mentor: Assoc. Prof. Guido Tack @ Monash University

Melbourne, Australia

Mar. 2026 – present

- Focused on formalizing MiniZinc in Lean, with the long-term goal of verifying the semantic equivalence between MiniZinc and FlatZinc.
- Formalized core of the syntax and semantics of ground MiniZinc, including core definitions, typing judgments and basic evaluation semantics.
- Created a python script as a translator to automatically generate Lean code from MiniZinc models.

AI for Mathematics, Shanghai Jiao Tong University

Mentor: Assoc. Prof. Tao Luo @ Shanghai Jiao Tong University

Shanghai, China

Jul. 2025

- Gained hands-on experience with formal theorem proving in Lean.
- Led a group project formalizing the proof of IMO 1988 Problem 6, known as the Vieta jumping problem.
- Formalized the proofs of two linear algebra theorems in Lean.

PROJECT EXPERIENCE

ACP 2026 Hackathon

Changchun, China

Aug. 2026

- Collaborated in a three-person team to solve a multi-tier airport gate, task-time, and labor scheduling problem under a 300-second runtime limit.
- Built a hybrid constraint-programming workflow using MiniZinc Chuffed and Google OR-Tools CP-SAT, warm-starting higher-tier instances from feasible lower-tier solutions.
- Applied adaptive neighborhood expansion and large neighborhood search, selectively releasing task variables and constraining cost to improve incumbent solutions.

HONORS & AWARDS

Third-class Academic Scholarship <i>Xi'an Jiaotong University</i>	Xi'an, China <i>Nov. 2024</i>
The 15th Chinese Mathematics Competitions for College Students (CMC) <i>Second Prize (Mathematics Major)</i>	Xi'an, China <i>Dec. 2023</i>
Tsinghua University Yau Mathematical Sciences Leaders Program <i>Selected Candidate for On-campus Selection</i>	Beijing, China <i>Dec. 2022</i>
The 38th National High School Mathematics League <i>First Prize, Chongqing Provincial Division</i>	Chongqing, China <i>Nov. 2022</i>
The 17th China Northern Mathematical Olympiad (CNMO) <i>First Prize</i>	Online <i>Aug. 2022</i>
The 37th National High School Mathematics League <i>Second Prize, Chongqing Provincial Division</i>	Chongqing, China <i>Oct. 2021</i>
The 18th China Southeastern Mathematical Olympiad (CSMO) <i>Silver Medal</i>	Nanchang, China <i>Jul. 2021</i>
The 36th National High School Mathematics League <i>Second Prize, Chongqing Provincial Division</i>	Chongqing, China <i>Oct. 2020</i>
